Education in the Nature

[Www.equap.eu](http://www.equap.eu)

Our brief history

Colégio do Sardão was founded in 1879 by Sister Paula Frassinetti (an Italian saint and foundress of the Congregation of St. Dorothea) at a family house and at the same time a farm with the same name. Their original owners were maternal aunts of a famous Portuguese writer, Almeida Garrett, which donated the property and all the goods to the congregation, in order to educate the youth of the region. In 2004 the school celebrated 125 years of existence. Nowadays, the school population includes a kindergarden with 5 classes and a primary school with 10 classes. Our involvement in international projects started 10 years ago, and since then we haven't stopped.

Methodology

We use as a work methodology The Project Method initiated by John Dewey, using a pedagogical grammar that will drink both from the Pedagogy -in-Participation defended by Julia Oliveira Formosinho and shared learning by Vygotsky.

Pedagogy in Participation constitutes a "transformative" pedagogy that believes in child rights, understands its jurisdiction, hears his voice to transform pedagogical action in a shared activity" (Oliveira-Formosinho, 2007, p.14).

Steps of the Project

Intention - organizing ideas - What?
Talk about us and how we like to live and coexist with each other and what it entails;

Preparation - How? Listening to stories, registering, requesting the cooperation of parents;

With whom? With children, assist teachers and other teachers;

With what? With materials that we collect and research;

Where? In the classroom, at the school playground, on field trips, at home;

When? Throughout the year

Kindergarden Blogs

All the teachers also have a blog where they can share their work with the school community, here are their links:
